File in Soap Administration

Weights

PURPOSE: To determine infant weight in grams.

POLICY: Newborn infants are weighed as part of routine newborn admission. All infants should be weighed as soon as condition permits.

Weights should be done and recorded daily (11-7 shift). Normal weight loss in the first 7 to 10 days of life is 5-10 % of birth weight.

Bio-medical team from IHC will calibrate every 6 months.

EQUIPMENT: Scale
Disposable scale liners

PROCEDURE:

1. Place liner on scale and discard after charting weight to prevent cross contamination and weight loss through conduction.
2. Balance scales and warm with heat lamp.
3. Place naked infant on scale using heat lamp to avoid chilling.
4. Lift tubes or lines which infant may have as much as possible.
5. Read weight measurement in grams and also pounds and ounces.
6. Return infant to crib, warmer or incubator.
7. Record weights on weight record sheet and bedside chart.
8. Record weight loss greater than ten percent of birth weight in the chart and notify MD.
